# FUTURSTALGIA

Welcome to Futurstalgia: a landscape that is strangely familiar and evokes the colour fades, chrome and neon of 80's design yet is futuristic, atmospheric and female.

London-born .EPOD hails from a high-rise estate, his love for urban city life and industrial architecture being the catalyst that inspired his early career work. His style has developed to be a fusion of graffiti, concept paintings and fine art, transporting the viewer to alternate realities while playing on preconceptions of the future.

French-born NERONE is inspired by the energy and vivid atmosphere of the street, his work evokes the labyrinth of city night-life while simultaneously fusing club culture, neon and the more natural element of his alluring flowers. His work looks to a more immediate future and the ecological and economic challenges that lie ahead.
